

For new or relocated shrubs:

Installation Steps:

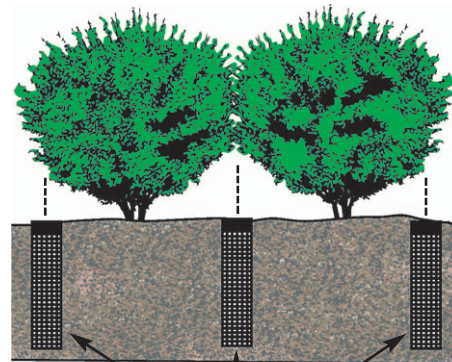

1. Install Shrub RWS units, per drawing. The number of RWS units will vary depending on the size, type and watering requirements of the shrub (1 - 2 RWS units are recommended per shrub). For planting a row of shrubs, plant per drawing.
2. Place units vertically with top even with ground surface. The RWS-S series requires a 10" hole depth.
3. For the RWS-SG, add irrigation components if desired.
4. For models with the pre-installed hardware, connect the 1/2" barb fitting to the lateral line.
5. Fill area surrounding unit with soil.
6. Follow planting guidelines for specific shrub species, and for local conditions.

Single Shrub

Space units evenly as shown.

Row of Shrubs

Position units evenly spaced as shown.

For existing shrubs:

Installation Steps:

1. Core out holes to 10" depth.
2. Position units evenly spaced, per drawing. The number of RWS units will vary depending on the size, type and watering requirements of the shrub (1 - 2 RWS units are recommended per shrub). For planting a row of shrubs, plant per drawing.
3. Place units vertically with top even with ground surface. The RWS-S series requires a 10" hole depth.
4. For the RWS-SG, add irrigation components if desired.
5. For models with the pre-installed hardware, connect the 1/2" barb fitting to the lateral line.
6. Fill area surrounding unit with soil.
7. Follow planting guidelines for specific shrub species, and for local conditions.

Single Shrub

Install product with top even with ground surface
